About Me

Hello, my name is Abbie Coen. I am a Civil and Environmental Engineering major at Rowan University in Glassboro, NJ where I was also a member of the Women's basketball team. I chose Rowan University because I wanted to get a great engineering education while I played basketball at the collegiate level. Rowan University also happened to be a few hours away from where my family lives in Morgantown, WV. They could attend any of my games that they chose. It turned out to be a great decision for me. I grew up quickly, learned great time management, will receive a great degree in a STEM field, and made lifelong friends.

After finishing my degree in Civil Engineering in May of 2024, I want to enter a master's program in Architecture. I think that I needed to know how to build things before I focus on how to design them. I have a lot to learn with respect to the artistic aspect of being an architect. I have a few items of interest in my portfolio, and I want to share them with you. Thank you so much for the interest in me and my professional goals.

My Childhood Home

My father was always bugging me to draw a picture of our home. For Christmas, I decided to make this his gift. It was simple pencil artwork of the home without anything else surrounding it.

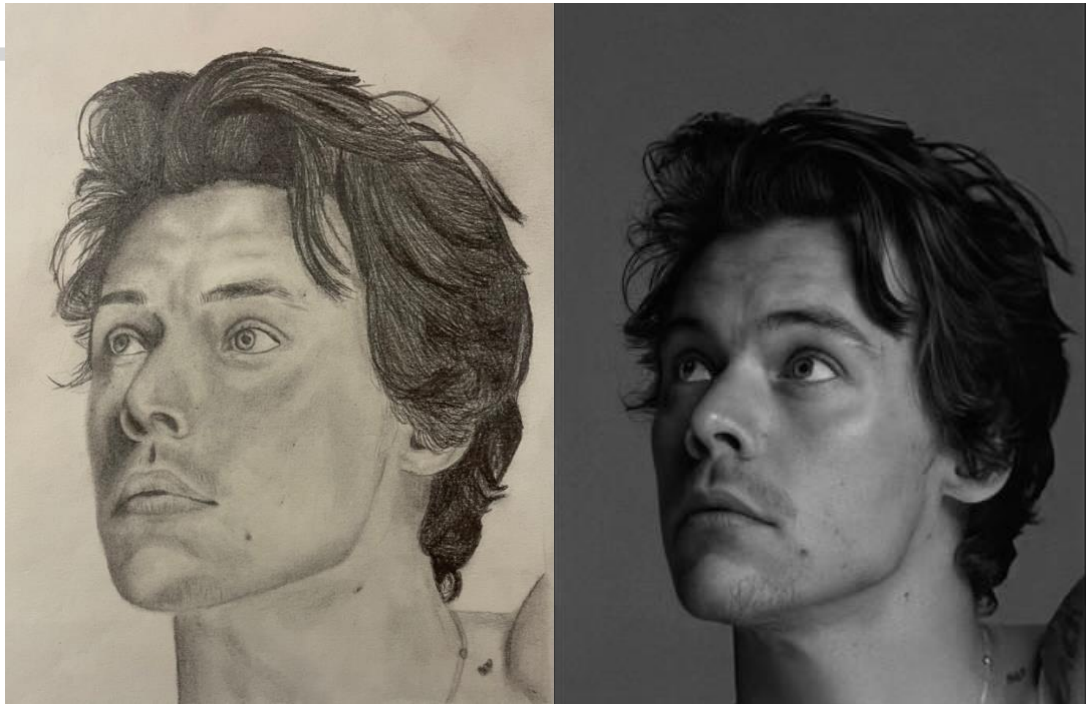

Date December 25, 2020

Project Pencil Art

Harry Styles

My friends and I are huge Harry Styles fans. We go to his concerts whenever and wherever we can and as often as we can. I wanted to create something special for my friend Fauve on her birthday. I took one of her favorite photos of Harry and made my own version of it for her using only pencils.

Client My Friend and College Roommate – Birthday April 2023
Project Pencil Art

Cityscapes

I love being in the city. Two of my favorites are New York City and Seattle. I lived in Seattle for over a year and enjoyed every minute of it. I could see myself moving back. I tried to create a representation of both so you know what you are looking at but none of it is real.

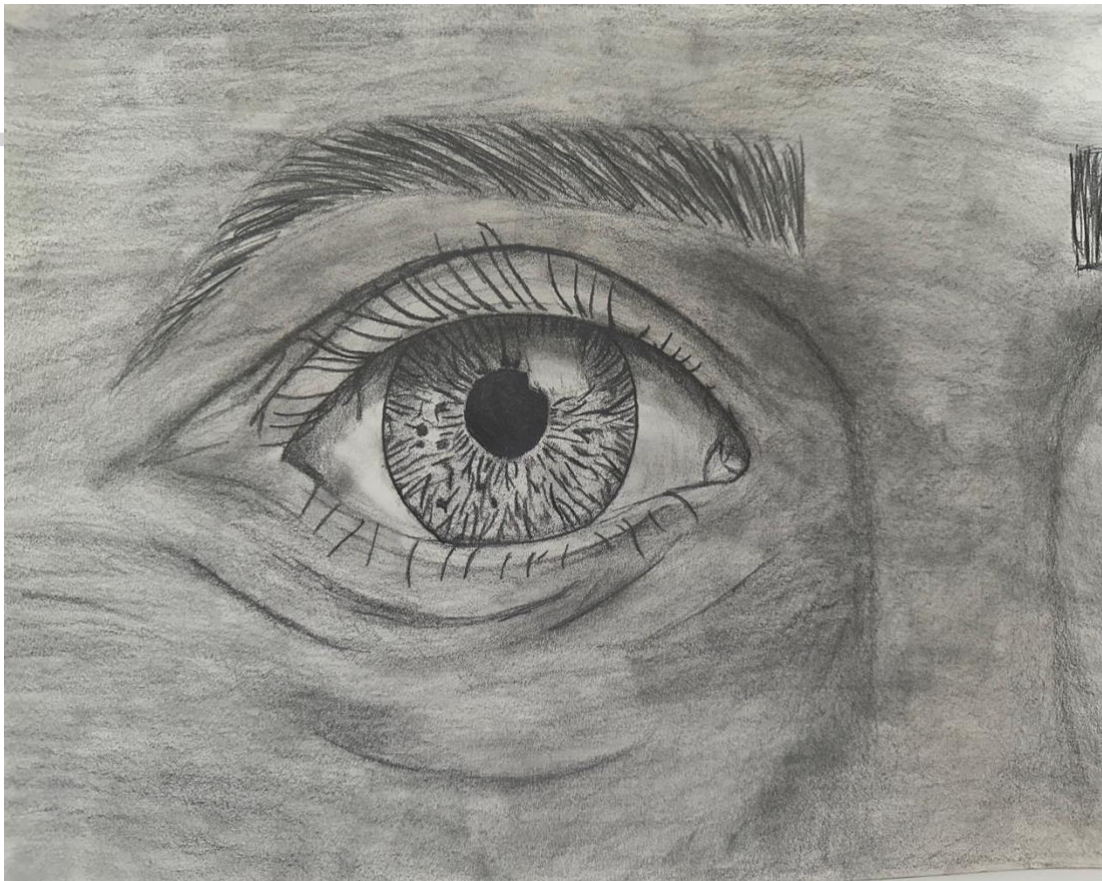

Date March 2020

Project Acrylics

The Eye

Nothing all that interesting here with respect to a backdrop. I just created a close-up view of an eye with a slight angle to the profile.

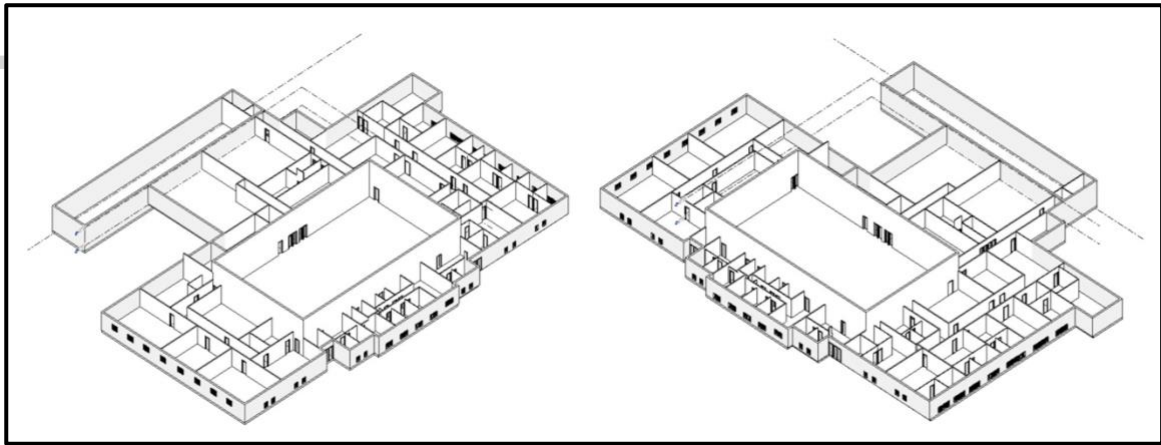

Date February 2019

Project Pencil Art

NGTC - Sea Girt, New Jersey

This is the floor plan of Building 35 of the National Guard Training Center located in Sea Girt, New Jersey. I designed a new floor plan with updated HVAC and other building systems. I used AutoDesk Revit and AutoCAD Recap to design this.

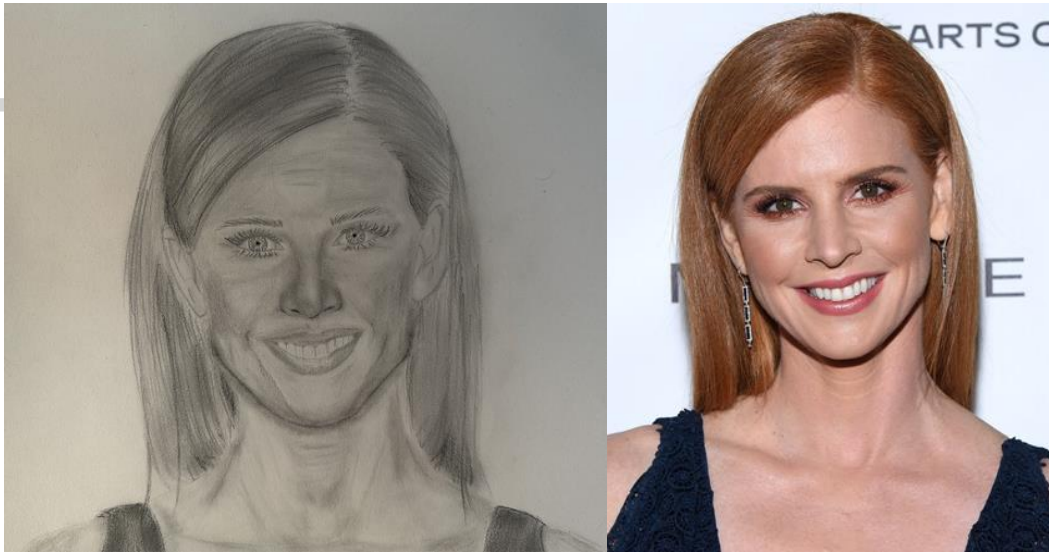

Date May 2023

Project 3D Modeling

Sarah Rafferty

I am a huge fan of the show "Suits". My favorite character is Donna Paulsen, played by Sarah Rafferty. She also appeared on an episode of "Bones", which is my all-time favorite television show!

Project Pencil Art

Bruce Springsteen – The River

My mother is a huge Bruce Springsteen fan. I wanted to create something special and unique for her on Mother's Day. I took the the cover of The River album and made my own version of it for her using only pencils. When my mother opened the gift, she was confused as to why I was giving her a picture of The River album. She had no idea that I had created it for her!

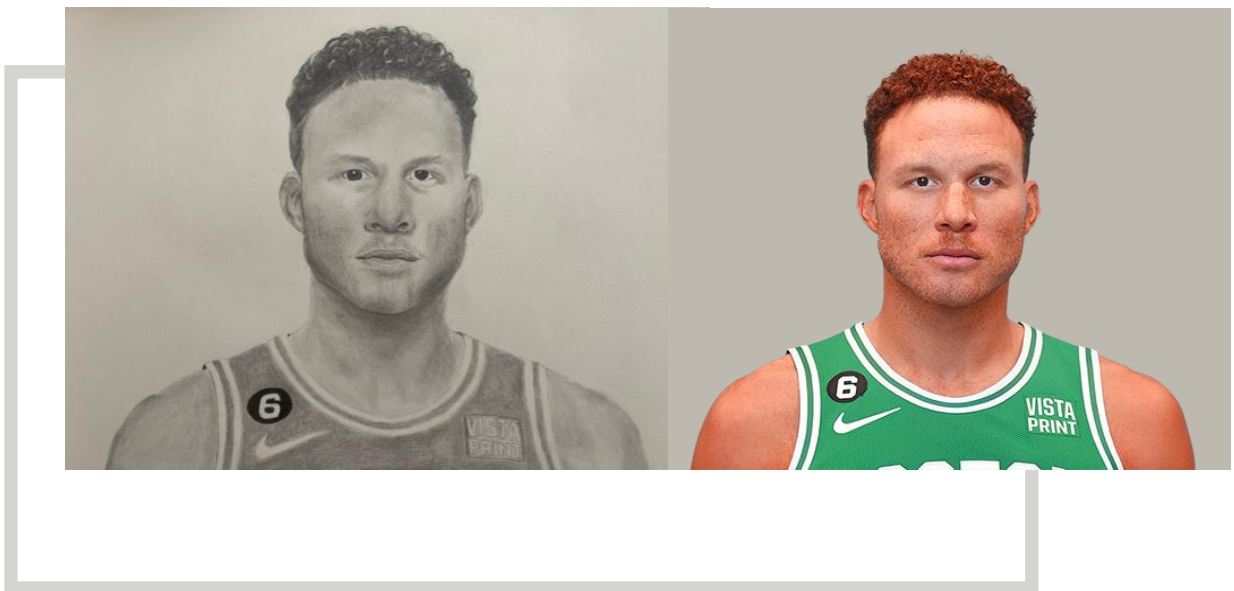

Date Mother's Day 2020
Client My Mother
Project Pencil Art

Blake Griffin

My absolute favorite athlete is Blake Griffin. As a kid growing up playing basketball all the time, I really liked how Blake played the game. I see him as a throwback basketball player to an era of the game that doesn't exist today. I modeled my game after his. I enjoy being physical and playing with power. Today's game is more finesse and focused on the perimeter with the likes of Steph Curry and others. I have seen him play for every team except his first, the San Diego (at the time) Clippers.

Project Pencil Art

Seattle Skyline

I loved my time in Seattle. It inspired me in so many ways I cannot explain. I want to live there after I graduate. This is a fun picture I created with the Space Needle with buildings around it. It doesn't represent reality, but I think it shows an interesting perspective.
